CORN FOR ENSILAGE

It is a mistaken idea that any kind of corn will make good Ensilage. While it is of great consequence to have a maximum yield of stalks (and that result can only be had from the **Giant Dent Varieties**) excellent quality of Ensilage can only be obtained from the **Early Ripening Varieties** of these. Some of the **Improved Dent Varieties** are now just about as early as the flint varieties and some of them should always be used.

DENT VARIETIES

- ✓ **Wisconsin White Dent**—One of the best for fodder or ensilage. Recommended by Guelph Agricultural College. Bushel, \$1.30
- ✓ **New White Cap Yellow**—Matures three weeks earlier than Red cob, grows heavy stalks, the lower leaves keeping long green, and while the ears are as large as any of the Dent Varieties, they are numerous and much fuller at the points. Bushel, \$1.25
- ✓ **Champion White Pearl**—This variety has given very great satisfaction. It is a medium early White Dent Variety, of branching habit and profuse foliage, and produces large sized ears. Bushel, \$1.30
- ✓ **Bloody Butcher**—A new variety of great merit. A strong, vigorous variety with immense ears. Bushel, \$1.25
- ✓ **Clark's Early Butler**—A good all-round corn. Bushel, \$1.20
- ✓ **Clark's Early Mastodon**—This is the largest eared early corn and produces a heavy yield of fodder. It is the favorite variety in the United States to-day and is worth a trial here. Bushel, \$1.25
- ✓ **Improved Early Leaming**—A very early tall growing variety, produces well on light or heavy soils, pedigree seed. Bushel, \$1.15
- ✓ **Cuban Giant**—One of the best for fodder. Bushel, \$1.20
- ✓ **Paragon**—Giant White Southern. Bushel, \$1.10
- ✓ **Selected**—Red Cob. Bushel, \$1.10

- ✓ **Salzer's North Dakota**—It grows a heavier crop of forage than any of the early Flint sorts, has larger ears and is sure to ripen sufficiently for silo. 8 feet. Bushel, \$1.40

- ✓ **Sandford**—A White Flint variety of strong growth, and sure to ripen its ears sufficiently to make the best sweet tasted ensilage. 8½ ft. Bushel, \$1.20
- ✓ **Early Longfellow**—Another early variety of Yellow Flint Corn; generally conceded to be one of the best of the very early varieties, either for Ensilage or ripe corn. 8 feet. Bushel, \$1.20
- ✓ **Early Compton**—One of the earliest varieties of Yellow Flint Corn. 8 feet. Bushel, \$1.25

SUGAR VARIETIES

The best and most profitable varieties for Dairymen for either green feed or curing dry.

- ✓ **Sugar Fodder or Evergreen Sugar**—Is a heavy cropper, and is undoubtedly more nutritious than other sorts that are not sugar varieties. 9½ feet. \$4.00 per 100 lbs.
